Product Description:

LDPE 2602TH00

High clarity Film

## Applications:

It is used in combination with LLDPE in products like diaper film, underblankets and films for medical applications.

## Typical Data:

Property	Unit	Value	Test Method
MIFR*	dg/10min	1.9	ISO 1133
Density	kg/m <sup>3</sup>	926	ISO 1183 (A)
	<b>Optical</b>	properties	
Haze	%	7.1	ASTM D1003A
Clarity	$\geq mV$	11	DSM METHOD
Gloss	$\square \% \square$	61±5	ASTM D2457
	Form	ulation	
Anti oxidant**	ppm	600±60	DSM METHOD
Anti block	Qpm	4	
Slip	PRO		
	Film Pi	roperties	
Impact Strength	kJ/m	(15)	ASTM D4272
Tear Strength TD	kN/m		ISO 6383-2
Tear Strength MD	kN/m	90	ISO 6383-2
Yield Stress TD	MPa		SO R527-1
Yield Stress MD	MPa	13	<u>ISO R527-1</u>
Tensile Strength TD	MPa	20	JSO R52'-1
Tensile Strength MD	MPa	30	SO R527-1
Elongation at break TD	%	>500	ISO R527-1
Elongation at break MD	%	>150	ISO R5271
Modulus of elasticity TD	MPa	260	ISO R527-1
Modulus of elasticity MD	MPa	240	ISO R527-1
Secant Modulus			
Puncher resistance			
Coefficient of friction		>1.0	ASTM D1894

\* The values given for MFR and Density are targeted values. This exact values are guaranteed by licensor within applicable given ranges.

\*\* By customer request

## Storage, Handling:

As poly ethylenes, like most polymers, are combustible, the usual precautions concerning ignition sources should be taken in warehouses and storage rooms. Where large quantities are kept in store, it is necessary to observe the normal rules for orderly stock control and to keep out dust and moisture. it should be stored in such a way to prevent exposure to direct sun light, as this may lead to quality deterioration.

Health, Safety, Food Contact:

Under normal conditions polyethylenes do not present a toxic hazard through skin contact or inhalation. During processing contact with molten polyener and inhibitation of volatilized fumes should be avoided. The chemical composition of the polyethylene grades comply with USA-FDA.

**Environment, Recycling:** 

The environmental aspects of any packaging material do not imply waste issues but have to be considered in relation with the use of natural resources, the preservations of foodstuffs. Whenever thermal recycling of packaging is carried out, polychylene with its fairly simple molecular structure and low amount of additive is considered to be a trouble-free fuel.

Packaging:

This is supplied in the form of pellets, in big bag (1000 Kg) or 25 kg blgs. The 25 kg blgs. The 25 kg blgs.
