One-package type stabilizer for plasticized processing.

**Composition:**

LX-368N is the mixture of Cd-Ba-Zn metal soaps, phosphite and solvent.

**Appearance:**

Brown, clear liquid

**Technical Data:**

Refractive index, 30°C	1.4775~1.4845
Specific gravity, 25°C	1.0180~1.0260

**Application:**

Preferably use for the manufacture of flexible and semi-rigid PVC by calender or extrusion process. By using co-stabilizer as ESO, the efficiency of LX-368N can be synergistically increased.

**Properties:**

It provides good initial color and good transparency along with good long-term heat stability compared with normal Cd-Ba-Zn stabilizing system. In addition, LX-368N has a good self-lubricating effect.

**Dosage:**

PVC: 100  
DOP: 30-80  
ESO: 2-5  
LX-368N: 1.5-3.5

**Storage:**

It is recommended to store LX-368N at room temperature and to protect the product against the effects of heat and frost. If stored in sealed original containers, LX-368N will keep for at least 6 months

**Packing:**

200 KG/DRUM
