Description : Ethyl Acetate

| Specifications                 | Units        | Value             | Test Method   |
|--------------------------------|--------------|-------------------|---|
| Ester content as Ethyl Acetate | % mass       | 99.8 min.         | GC Method   |
| Water content                  | % mass       | 0.05 max.         | ASTM E1064<br>Using suitable<br>Karl Fischer titrator |
| Acidity (as Acetic Acid)       | % mass       | 0.005 max.        | ASTM D1613  |
| Density                        | Kg/l @ 20 °C | 0.899             | ASTM D4052-91   |
| Color                          | Pt/Co        | 5 max.            | ASTM D1209  |
| Appearance                     |              | Clear , Colorless | Visual  |
| Odour                          |              | Characteristic    |   |
| Residue on Evaporation         | % mass       | 0.002 max.        | ASTM D1353  |

Comments : Physical properties are not monitored constantly .

The quality of Ethyl Acetate is monitored closely by Gas Chromatography (GC).

Issue of Revision Date : 25 July 2009
