DESCRIPTION

Gum rosin or refined gum rosin is a kind of natural resin, mainly composed of various kinds of resin acids; it can be dissolved easily in many organic solvents, and has special chemical activity. So it is an important raw material for the production of paper, coatings, inks, rubber, soaps, electronic industrial products, food grade ester gum, rosin ester resins etc.

Specifications

Items	WW Grade
Appearance	Transparent Solid
Color,(Gardner grade)	Pale yellow
Softening point, (Ring & Ball), °C, Min	76
Acid value (mgKOH/g), Min	166

Application

- Synthetic resin
- Rubber
- Tackifiers and sealants
- Inks
- Coating and lacquers
- Soldering fluxes
- Paper size modifier

Package

- Drum: : galvanized iron drum, 225kgs net each drum
- Kraft paper bag or plastic intertexture bag : 25kgs net each bag
